Renewable Fuel Systems

AquaHOD Fuel Systems

<http://www.aquahod.com/>

<http://hydrogenod.com/>

Alpha "AquaHOD Fuel Systems" fully substitute Gasoline, Diesel, Natural Gas and offer the same performances, duration, reliability of gasoline, diesel, gas fuel systems.

"AquaHOD Fuel" costs roughly 0 (zero) per km.

"AquaHOD Fuel Systems" are available for all Gasoline, Diesel, Gas Engines & Systems. For Cars, Vehicles, Trucks, Bus, Motorbikes, Water Heaters, Boats, Power Generators, Power Stations, AirPlanes.

"AquaHOD Fuel Systems" include "AquaHOD Processing Unit" and "AquaHOD Conversion Unit" (for Gasoline, Diesel, Gas).

Alpha "AquaHOD Fuel" is produced "on board" "on-demand" when running by Water and a Cartridge that can be easily regenerated in a few minutes, everywhere, unlimited times at roughly no costs.

Alpha "AquaHOD Fuel Systems" have been designed, developed and then set up in large scale manufacturing as part of the "Space & Energy Project" approved on 2001.

"AquaHOD Fuel" fully substitutes gasoline, diesel, gas with same performances, duration, reliability and costs roughly 0 (zero) per km versus very high prices of gasoline, diesel, gas.

By installing "AquaHOD Fuel Systems" you no longer need any other Fuel and you would no longer spend any money for Fuel.

They are available for all gasoline, diesel, gas engines. For cars, vehicles, trucks, boats, boilers, power generators, power stations.

"AquaHOD Fuel" is a mixture of Hydrogen and Air that is produced on-board when engine is running by the "AquaHOD Processing Unit".

The "**AquaHOD Conversion System**", available for all existing gasoline, diesel, gas engines, for cars, vehicles, trucks, boats, motorbikes, water heaters, power generators, power stations, airplanes, run them with same performances, duration, and reliability of factory installed fuel systems. "**AquaHOD Fuel**" is produced "on-board" "on-demand" by Water and a Cartridge that can be easily regenerated in a few minutes, unlimited times, everywhere, at roughly no costs.

There is not any Fuel stored at all as it is produced "on-demand" when running in accordance with engine requirements. "**AquaHOD Fuel Systems**" are the safest ever worldwide.

Price of the whole "**AquaHOD Fuel System**" that includes the "**AquaHOD Processing Unit**" and the "**AquaHOD Conversion System**" is very attractive and not expensive.

It is a true Revolutionary Product that has been developed since more years as part of the "Space & Energy Project", Fuel and Propulsion Systems.

The "Space & Energy Project" included the development of the most advanced Reusable Space Launchers and 44GW of Power capabilities.

Each "**AquaHOD Conversion System**" is available in several thousands set up in accordance with the specific brand, model, engine, for cars, vehicles, power generators, etc... Price accordingly.
